PROJECT

Made a website:- [Okayresult.com](https://okayresult.com)

Website url - <https://okayresult.com/>

->I have made for student help.

->I have used **html ,css,bootstrap,jquery,js(basic)** and so on.

->This website provides current job related updates and if there is any money requirement for Treatment of any family member of a college student then donate money with the help of this website.

setuorder.com — multi-vendor marketplace

Website url - <https://setuorder.com/>

->This website provide easy to buy and sell product(specially in pandemic)

-> Here any seller can register and the seller gets a panel after verification.

By this panel sellers can upload products and write prices and details.

-> Any customer can buy online(payment gateway integrated) or go to shop and buy (every shop address given).
