## PROJECT

### Made a website:- Okayresult.com

Website url -https://okayresult.com/

->I have made for student help.

->I have used **html ,css,bootstrap,jquery,js(basic)** and so on.

->This website provides current job related updates and if there is any money requirement for Treatment of any family member of a college student then donate money with the help of this website.

### setuorder.com — *multi-vendor marketplace*
Website url -https://setuorder.com/
->This website provide easy to buy and sell product(specially in pandemic)

-> Here any seller can register and the seller gets a panel after verification.

  By this panel sellers can upload products and write prices and details.

-> Any customer can buy online(payment gateway integrated) or go to

  shop and buy (every shop address given).
